

#DIGI INVENTORS CHALLENGE

#DigiInventors Challenge – Primary School Edition

6 Application questions that your idea should answer

Your application to the #DigiInventors Challenge, Primary School Edition, should describe a new digital solution to help young people keep active and stay both physically and mentally healthy and happy, now and in the future.

IMPORTANT: Entries must never have been published on any website, blog or online forum, nor have won or/ been placed (i.e. 2nd, 3rd, runner up etc) in any other competition.

When writing your application, you should answer the following questions as best you can.

1. What is my idea and how does it work?

We are looking for a description for a brand-new digital idea. Judges will need to understand what your digital idea is and exactly how it will work.

2. What health and care problem does my idea solve? And why is this important to the health and care of young people?

Your application should explain what part of health your idea will help with. Make sure you explain why it is important to the health and care of young people. To make sure you get the best score possible your answer should refer to researched facts and numbers to help explain how big the problem is that your idea will help fix.

3. How does my idea apply digital technology and how does it include features that benefit the environment and contribute to achieving net zero carbon emissions?

The best applications should show how much you understand about the technology your idea is developing or will use. Your idea needs to be realistic as we want to help you make it a reality.

4. Could my idea be made available to all young people? If so, how?

Your application should tell us how you think your idea can be made available to all young people. This should include ideas on how you could advertise your idea or what you could do to make it easy for everyone to access your technology.

5. Why do I think my idea should win?

Your application should explain what you think will make people want to use your idea? And what are the benefits of your idea for health and wellbeing of young people?

6. What do I think my idea needs to make it a reality?

Your application should tell us what you think your team and your idea needs to help it become a reality. What might the next steps be if we were to work with you to make your idea into a business.

Teams voice over presentation/ video

Voice over presentations/ videos should help the judges clearly understand your idea and how it will work.

Your pitch should include:

- What problem of young people's health your team is trying to solve and why is it important to health and care of young people?
- How big the problem is (**include facts and figures**).
- What your solution is and how it will work.
- Diagrams/ drawings of your solution (**no more than 4**).

Important: Videos should be no more than 5 minutes long

Please upload your voice over presentation/video via a YouTube link in your application via the #DigInventors website.

If you are unable to use YouTube, please make sure that you provide the following email access to your glow/ google drives so we can access any files you are sharing
olivia.dunbar@dhi-scotland.com)

Top Tips

1. Make sure that your video does not exceed the time limit of 5 minutes
2. Allocate different roles for different team members to share the workload and also benefit from team members skills and expertise
3. Not all team members need to speak in your final video pitch
